

# Milk Leakage? Keeping it discreet

*No. 1 choice  
of hospitals  
& mothers*

# You are the only one who knows!

If you are affected by milk leakage, we help to keep it to yourself.

- | It can lead to visible spots on your clothing. Bra pads can protect you and your clothes and give a comfortable and secure feeling.
- | But...visible bra pads can attract attention because of a poor fit or thick shape.
- | And non-breathable materials can lead to an uncomfortable, clammy feeling.
- | What about hygiene? It is very important when breastfeeding. But how hygienic are bra pads?

# What is your intensity?

The circumstances and intensity of milk leakage can vary during breastfeeding.

**challenge 1**  
excessive milk leakage

Disposable Nursing Pads

Hygienic and comfortable whilst on the go

Keep you feeling dry and comfortable

Discreet and invisible under clothing

**challenge 2**  
minimal milk leakage

Washable Bra Pads

Lasting protection against disagreeable odours

Easy-to-clean

Reusable and ecofriendly

**challenge 3**  
milk leakage during breastfeeding

Milk Collection Shells

Every drop of breastmilk that leaks during breastfeeding is collected

# Designed to help you stay dry and confident

## challenge 1 our recommendation

Disposable Nursing Pads

Disposable Nursing Pads are super absorbent and offer longer protection. The nursing pads are made of a super absorbent material which prevents milk leakage and maintains dryness – day or night. The soft lining ensures comfortable feeling on skin and the specially designed shape adapts to the shape of the breast for discretion. Two adhesive tapes keep the pads in place without moving which make mums feel secure and protected.

The nursing pads are individually wrapped for added hygiene and on-the-go convenience.

# Do you suffer from minimal milk leakage?

## challenge **2** our recommendation

Washable Bra Pads

Washable Bra Pads have ultrasonically sealed stitching which prevents leakage and gives you a secure, comfortable feeling. The antimicrobial material reduces the risk of odours and bacterial growth and protects you against disagreeable odours.

- I Antimicrobial material**
- I Reduces the risk of odours and bacterial growth**

# Do you suffer from milk leakage during breastfeeding?

## challenge **3** our recommendation

Milk Collection Shells

Milk Collection Shells provide a secure solution. Breastmilk is collected and clothing are protected. Breastmilk can be easily emptied through a convenient spout. The opening in the membrane can be centered over your nipple and does not rub against it. They are comfortable on the skin and provide an optimal fit as the material is soft and flexible.

**I Spout: The collected breastmilk can be poured out easily**

## Medela – the complete solution for every breastfeeding mother's needs

- | We have more than 50 years experience in breastfeeding products.
- | We have been carrying out intensive research with professionals for more than 20 years and we develop new products based on the latest findings.
- | We develop and produce our products in accordance with a certified quality management system.
- | Our personal use pumps are medical devices and fulfill the highest requirements.
- | We offer research-based high-quality products made in Switzerland.
- | With subsidiaries in 18 countries and affiliates in over 90 countries we provide a unique service to customers.
